REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art discloses the use of the recited 'auxiliary components' in alumina ceramics. See e.g., 6,610,623. However, the prior fails to suggest that the claimed combinations will result in increased density at lower sintering temperatures. In contrast, table 1, page 11 of the specification shows that the claimed combinations result in unexpectedly improved density at 950°C compared to using the auxiliary components alone or in a non-claimed combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Sample whose telephone number is (571)272-1376. The examiner can normally be reached on Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jerry Lorengo can be reached on (572)272-1233. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
